McCallum Bagpipes

GUARANTEE

Your new set of McCALLUM BAGPIPES is guaranteed for a period of ten years from the date of purchase, provided proof of purchase is available or, alternatively, ten years from the date of manufacture stamped on the bass mid-joint pin.

In the unlikely event of a manufacturing defect in your new set of McCALLUM BAGPIPES, it should be returned to:

McCALLUM BAGPIPES (for UK customers)

The original seller (for ALL customers outwith the UK)

Excluded from this guarantee are normal signs of wear and tear or damage caused by inappropriate use, and pipe bags. This guarantee is in addition to your statutory rights and does not effect them in anyway.

IMPORTANT

For this guarantee to be valid the bagpipe must be within ten years of the manufacturing date as stamped on the bass mid-joint pin, or alternatively, for bagpipes outside this period but within ten years since the date of purchase, proof of purchase is required.

All pipes supplied with a 10 year, no quibble, guarantee.

McCallum Bagpipes

So cool... so CeòL

the McCALLUM CeòL CHANTER

A completely revamped McCallum Pipe Band chanter, with new internal sizes, new profile, and a re-designed reed seat and throat.

Suits a wide variety of reeds.

Round holes with a comfortable playing position.

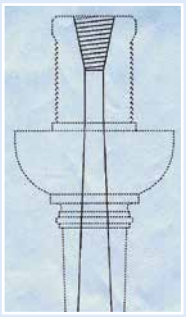
Creating music, not just sound

www.mccallumbagpipes.com

McCALLUM PIPE CHANTERS

African Blackwood or Plastic • No carving required • Easy to reed
Threaded reed seat • Comfortable to play • Good volume • Bright and stable

We put a thread on the reed seat of all chanters (except C4) which alleviates the problems of the reed coming loose, especially on the plastic chanter in dry conditions. This locks the reed in place until adjusted by the piper.



The thread means the reed is locked in place – it can't move unless the piper moves it.

It's also a much more accurate way of setting the chanter reed pitch.

You turn the reed clockwise to sink the reed and sharpen it, and the anti-clockwise to raise it and flatten it.

C1 and C1/Bflat | C2 and C2/Bflat | C3 | C4

C1 **McCallum plastic pipe chanter available in MkI, MK2 and Mk3**

C1/Bflat **McCallum plastic pipe chanter in B-flat**

C2 **McCallum blackwood pipe chanter**

C2/Bflat **McCallum blackwood pipe chanter in B-flat**

Our standard Pipe Chanter (C1, C2) is played by pipe bands worldwide, including many of the top Grade 1 bands. In addition, it is also played by many top soloists and has won almost every top piping award.

C3 **McCallum McC² plastic pipe chanter**

C4 **McCallum McC² blackwood pipe chanter**

Our McCallum Solo Chanter (known as McC²) was designed exclusively by Willie McCallum and has won almost every top award since 2007. It is played by many bands throughout the world and indeed, won the Grade 2 World Championship in 2008, played by Bagad Cap Caval.

C7 **Campbell Tuneable chanter**

C7/Bflat **Campbell Tuneable chanter in B-flat**

Now you can tune your chanter very quickly by simply turning the tuning dial to raise or lower your reed – while you continue to blow your pipes. Based on our Mark III design, with comfortable round holes, this chanter presents a bright sound with brilliant projection and stability.

CAMPBELL

INTRODUCING A QUICKER WAY TO TUNE YOUR BAGPIPES.

This new chanter will allow you to quickly change pitch by rotating the tuning dial - all while you continue to blow you pipes!

TUNE QUICKLY

Now you can tune your chanter very quickly by simply turning the tuning dial to raise or lower your reed - while you continue to blow your pipes!

CRAFTED BY McCALLUM

You know that McCallum's experience making bagpipes and pipe chanters are second to none, so we are thrilled to be working together on this chanter. Their interest in making a well balanced, refined instrument with bright tone is evident in all of their products.

QUALITY SOUND

The Campbell Chanter is based on McCallum's Mark III design that offers a winning combination already recognized throughout the piping community. With comfortable round holes, this chanter presents a bright sound with brilliant projection and stability.

WHAT PEOPLE ARE SAYING

"I have played the Campbell Chanter for 2 years and have found it to be well constructed and intuitive to use. The ability to quickly and easily sink or lift a reed without having to stop blowing or remove the chanter from the bagpipes greatly reduces the time needed to adjust to the current environment.

This chanter fills a void in the chanter marketplace that pipers have been needing for a long time."

Richard Wilson
City of Regina Pipe Band (Grade 2)

BROAD PITCH RANGE

The Campbell chanter has a broad pitch range because of the carefully designed floating reed seat. Expect to play within the range of 478-484Hz (B flat tuner).

PROTECT YOUR REED

There is no need to remove your chanter to change reed height anymore, thus providing less risk of damaging your valuable chanter reed.

AB0 Tenor Drone

AB0 BAGPIPES

African Blackwood – Fully Combed & Beaded

Classic style blackwood projecting mounts, with beaded alloy ferrules, and alloy slides and ringcaps. Plus a plain alloy mouthpiece with McCallum plastic pipe chanter.

Every McCallum set comes complete with:

Synthetic zipper pipe bag; bag cover with velcro seal; silk cords; synthetic drone reeds; and a 10 year, no quibble guarantee.

To customise your bagpipes, see options on pages 44 and 45.

McCallum Bagpipes are now supplied with McCallum alloy and threaded mounts. The new alloy does not tarnish and looks more like silver, giving your pipes a top quality finish.

Threaded Hemp Retainers – a hidden extra. All our bagpipes are now fitted with threaded hemp retainers. This used to be a service provided for the top of the range models, but we feel that every player we cater for and every pipe we produce deserves that little something extra.

McCallum Bagpipes

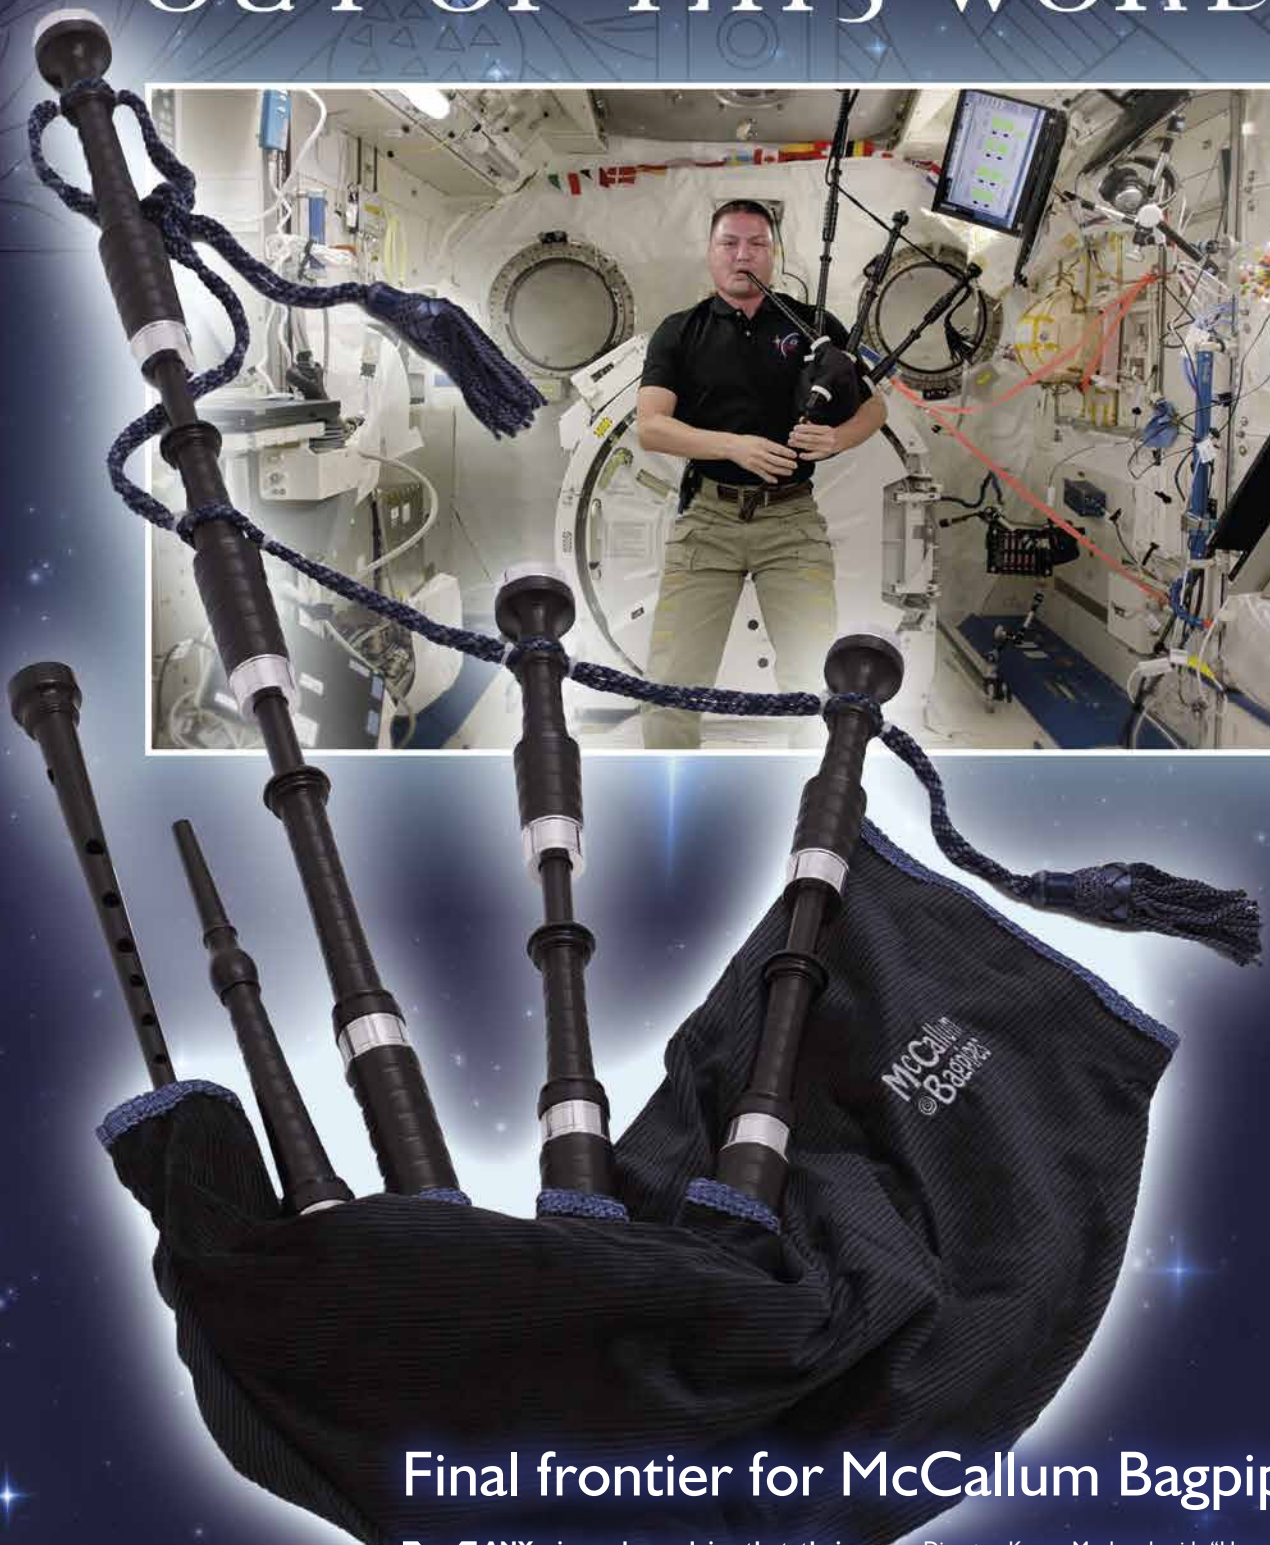
OUT OF THIS WORLD



Final frontier for McCallum Bagpipes

MANY pipemakers claim that their instruments are out of this world — but now we have proof after a set of McCallum Bagpipes were played by an astronaut on the International Space Station.

American Kjell Lindgren played *Amazing Grace* as a tribute after the death of his colleague Victor Hurst, a research scientist who had been involved in astronaut training. It's the first time the bagpipes have been played in space.

Kjell approached McCallum Bagpipes in 2013 because he wanted to play the pipes on his International Space Station mission and bought a set of acetyl pipes.

Director Kenny MacLeod said: "He wondered if it was feasible to play bagpipes. They're made of plastic — they're easier to keep clean and to make sure they're not contaminated. They are also lighter.

"Bagpipes are very difficult to play at high altitude because the air is that bit thinner. They're quite hard to blow so he's done well."

The video of Kjell playing the pipes was released by US space agency NASA in November.

It has been viewed more than 65,000 times on YouTube and also featured on the BBC and in the press.

One viewer commented: "No matter how cool you think you are, you'll never be astronaut-playing-bagpipes-in-space cool."
