IMPORTANT **INFORMATION!**

CARE INSTRUCTIONS:

TO ENSURE YOUR KILT REMAINS IN THE BEST POSSIBLE CONDITION FOR A LONG TIME, WE HAVE COMPILED SOME IMPORTANT TIPS FOR CARE AND STORAGE.

REMOVE BASTING STITCH (TRANSPORT SECURING STITCHES):

Before you wear your kilt for the first time, it is important to **remove the basting stitch**. These stitches are there to keep the kilt in shape during transport. Please be particularly careful: Use scissors or another suitable cutting tool and make sure not to damage the fabric of the kilt.

Carefully cut the stitches without touching the kilt to keep it in pristine condition.

CARING FOR YOUR KILT:

Please **do not wash your kilt yourself** to avoid damage! A traditional kilt is made of 100% wool and should only be treated by a professional dry cleaner. Choose a reputable cleaning company and avoid discount providers.

It is very important to have the kilt cleaned only when absolutely necessary. Generally, it is sufficient to just air out the kilt. A kilt rarely needs cleaning; often it is enough to have it dry cleaned every few years. If the kilt gets a stain, we recommend having only the stain professionally cleaned instead of the entire kilt.

If you decide to have the kilt fully dry cleaned, please inform the cleaner that the pleats should be maintained and pressed.

TRANSPORTING YOUR KILT:

To prevent your kilt from wrinkling during transport, we recommend rolling it. An effective method, especially when taking the kilt in a suitcase, is to use a stocking. Simply roll the kilt carefully and slide it into the stocking. This protects the kilt from wrinkling and keeps the pleats smooth.

For transport outside a suitcase, there are special kilt rolls that can be used either alone or in combination with a kilt outfit carrier. These are ideal for protecting your kilt during travel and ensuring the pleats and shape of the kilt are maintained.

It is very important to use these transport means only during transport. Once you reach your destination, you should unroll the kilt and hang it up to ensure good ventilation and correct pleat hanging. It is especially important never to leave the kilt rolled up when damp, as this can affect the quality and shape of the fabric.

STORE YOUR KILT AT HOME:

A special kilt hanger is essential for proper storage of your kilt. It allows the pleats of your kilt to hang naturally while ensuring good ventilation. It is important to always hang the kilt fully stretched. After wearing it, you can hang the kilt outside the closet initially to ensure it is fully ventilated before putting it away. This practice helps keep your kilt in optimal condition by providing good air circulation and minimising pleat formation.
