

*"I have personally been using a Trap Dri now for around a month and have noticed an increase in the amount of time I am able to play without the usual moisture issue I often used to get with a sheepskin bag set up. Combined with my Premium reeds I can now be confident that my pipes will last the pace when I need them too. A good number of the guys in the Scottish Power Pipe Band are now using the Trap Dri too and have also noticed how much additional moisture it captures which no longer gets into the bag."*
